New 80 gallon Square Double Wall Tank

Tank-in-a-tank system provides total containment

New Square footprint allows for placement in corners and tight spaces

NOW AVAILABLE! SPACE SAVING 80 GALLON SQUARE DOUBLE WALL TANK

Chem-Tainer is pleased to announce the addition of the new 80 gallon square double wall tank to our current line of 35-12,500 gallon double wall tanks. The new 80 gallon double wall tank is available for industrial applications for hazardous and non-hazardous chemical storage.

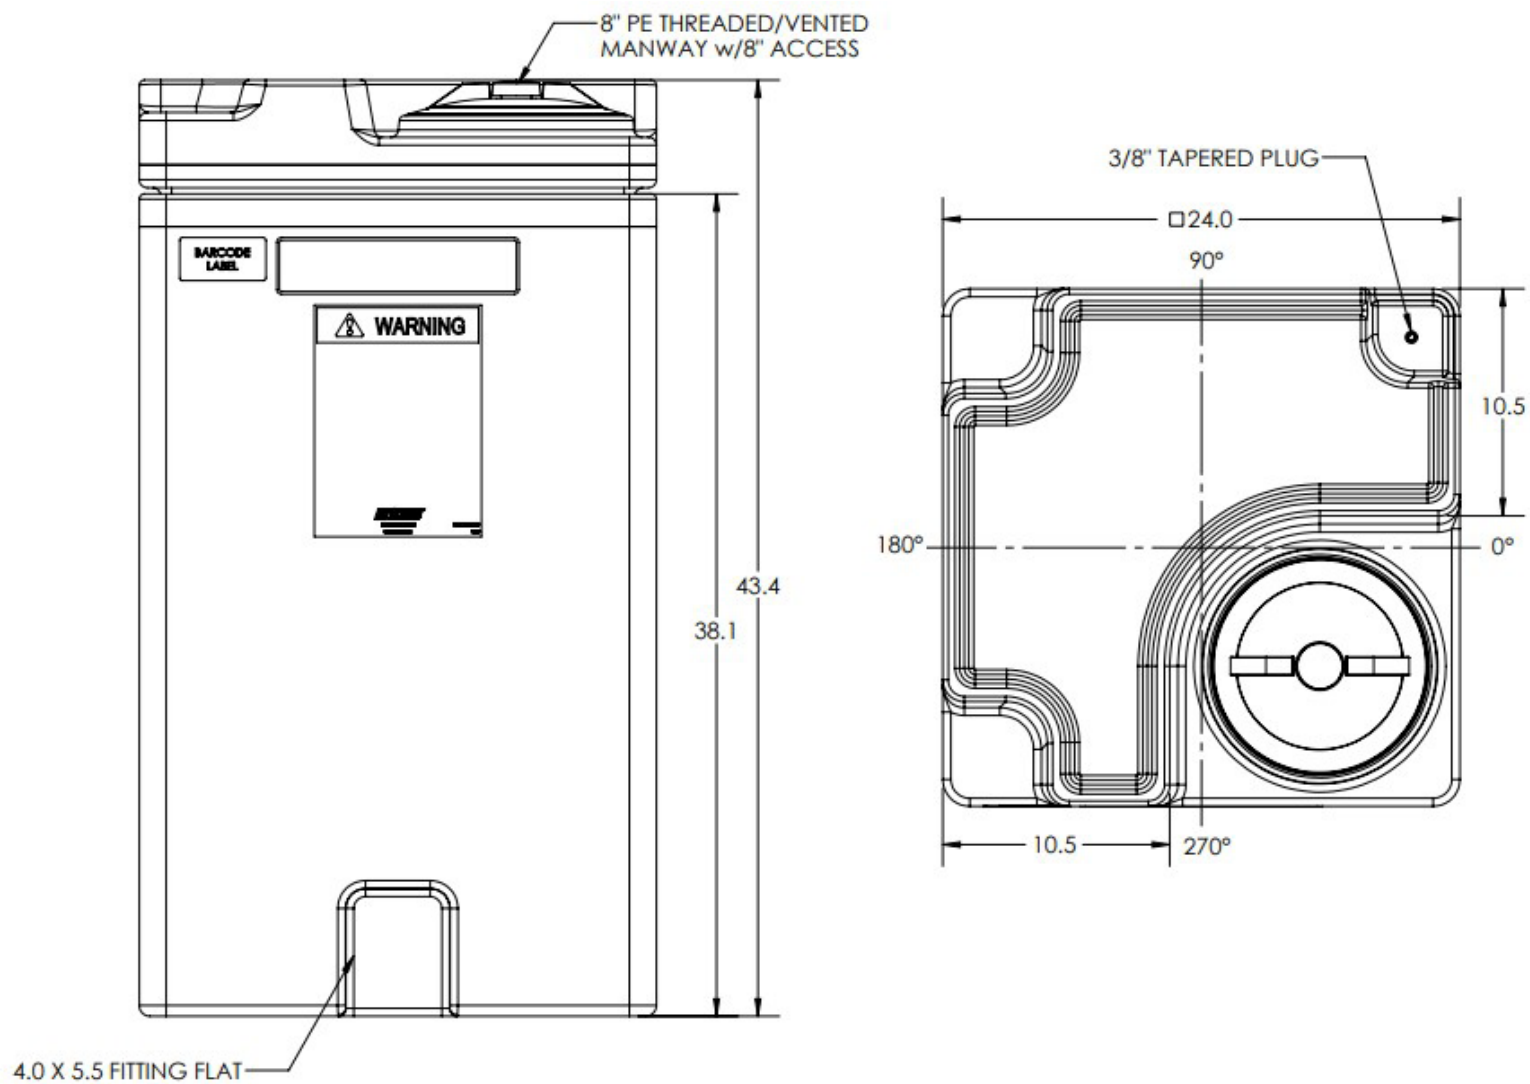

- **Space saving 24" x 24" Square Footprint - allows for more capacity giving additional storage in corners and other tight spaces.**
- **Tank-in-a-tank system provides TOTAL containment protection in one space-saving unit.**
- **High density virgin polyethylene construction - available in HDLPE or XLPE.**
- **110% containment to meet EPA standards.**
- **Recessed containment fitting flat to allow for bottom sidewall outlet option.**
- **Top flat areas for fittings and pump mounting.**
- **Drip channel molded into the top surface leading to collection drain back into primary tank to collect drips that may come from pump on top of tank.**
- **Recessed lid area prevents damage to lid during shipping.**

Chem-Tainer offers double wall tanks ranging in size from 35-12,500 gallons
